1. Your Device

Learn how to access the unique numbers that identify your device. Keep these for future reference.

ESSENTIAL INFORMATION

Your phone has several unique identifier numbers that you may need for activation and other functions. You can access these numbers as follows:

Serial Number

- ▶ Home > Swipe up > Settings > About device
Your Serial Number will appear under **IMEI**.

Phone Number

- ▶ Home > Swipe up > Settings > About device
Your Phone Number will appear under **Phone number**.

SIM Number

- ▶ Home > Swipe up > Settings > About device > SIM status
Your SIM Number will appear under **ICCID**.

Your SIM number can be found on the red Activation Card that came with your phone or, on the SIM card.

1. Locate the SIM/Memory Card tray on the left edge of the phone.
2. Press the pin tool provided into the hole until the tray pops out.
3. On the SIM card, you will see a number beginning with **89**. This is your SIM number.

For more information about your device:

Go to your service provider's website > Help > Tutorials and User Manuals > Enter **B1550VL** in the Search bar > click phone image > About Phone

2. Advanced Features

Learn about the advanced features that can make your device more personal and more fun to use.

GOOGLE ACCOUNT

You will need to create a Google (Gmail) account during the setup process or online at google.com/gmail to access Google cloud and other phone features.

Once your account is created, you will have **15GB** of storage linked to your account. If you need more storage space, you can purchase it directly from Google in the Backup menu.

Having a Google (Gmail) account will give you access to several features on your phone including:

- Google One cloud storage
- Google Assistant
- Google Play store
- Find My Device
- and more

Google One

► Settings > System > Backup > Backup by Google One

Google One is a file storage and synchronizing solution that lets you store files in the Google cloud. You can access information stored on Google One from any device or location, allowing you to collaborate on documents and to share files and photos. Using Google One also helps you save memory space on your device.

The files you store on Google One are private by default. You can change your privacy settings and share individual files and folders with specific people or choose to make them public so that anyone on the internet can view your shared files. You can change privacy settings at any time.

Google backup

Your backups are uploaded to the Google cloud and are encrypted using your Google Account password. Once your Google account is configured, the following options will be available:

- **Sync settings:** Enable or disable syncing for contacts, calendar, and other apps.
- **Back up my data:** Select content from your device to back up to Google One.
- **Restore:** Information in apps such as Contacts and Calendar can be restored.

This may vary by Android version and device you are using.

With a Google account you can:

- Activate device protection features.
- Download apps and other content from Google Play.
- Back up your apps to Google, and sync Google services like Calendar and Contacts with your other devices.

What content can be backed up and restored?

- Apps and app data
- Call history
- Contacts
- Calendar
- Device settings
- Photos
- SMS texts
- Wi-Fi passwords and permissions

Google Assistant

- ▶ Settings > Google > Settings for Google apps > Search, Assistant & Voice > Google Assistant

Your device has the Google Assistant feature built-in which you can access after you sign into your Google (Gmail) account. To launch the Google Assistant, press and hold the Home button, follow the prompts, and complete the set-up.

Once you complete the set-up, you can access Google Assistant by simply saying “OK Google” or “Hey Google”. You can use this voice assistant to launch apps, make plans, ask a variety of questions, and carry out tasks with a quick voice command. If you have multiple users set up on your device, Google Assistant will recognize up to 6 voices and will customize search results, calendar access, music, and other requests for each voice.

ACCESSIBILITY

- ▶ Settings > Accessibility

Accessibility services are special features and enhancements that make using the device easier. The services available in Accessibility allow you to customize the device to improve the experience of people with physical, sensory, or cognitive disabilities. You can turn Accessibility features ON/OFF as needed.

Many of the services available in Accessibility will make using the phone more comfortable for other users also.

Real Time text call (RTT): This is an alternative to external TTY devices. You can use RTT to communicate via text while you're on a voice call.

TTY: For those who are deaf, have poor hearing, speech or language impairments, TTY is an essential tool for communicating by phone.

Downloaded apps

- **Accessibility Menu:** Provides an accessibility icon at the bottom of the screen. Tap the icon to launch a large on-screen menu that gives you access to several features on your phone.
- **Select to Speak:** Tap a specific item on your screen to hear it read aloud.
- **Switch Access:** Allows you to control your device using one or more switches to select items, to scroll, text, and more.
- **TalkBack:** Set the device to read aloud what you touch, select, and activate on the screen so you can hear it without having to see it.

Display

- **Text and display:**
 - » Font size: Change the font size for easy viewing.
 - » Display size: Set the items on the screen to a size that is easy for you to see.
 - » Bold Text: Change the font boldness to create the appearance of darker text.
 - » Color correction: Adjust the color of the screen if you are color blind or have difficulty reading the display because of the screen color.

- » Color inversion: Invert the colors on the screen to help you see the content better.
- » Remove animations: Remove certain screen effects if you are sensitive to motion.
- » Large mouse pointer: Magnify the mouse pointer so that you can locate it and see it easier.
- » High contrast text: This feature locks the text color as either black or white, depending on the original text color making it easier to read text on your device. This feature may not be supported by all functions of your device.
- **Extra dim:** Makes the screen dimmer beyond your device's minimum brightness so it's more comfortable to read.
- **Dark theme:** Switch the color theme of the operating system or apps to black or to a very dark color. Very useful in dim light or at night to diminish eye strain. Some apps may not support this feature.
- **Magnification:** Zoom in or out by dragging or pinching with 2 fingers. You can temporarily magnify what's under your finger by pressing and holding anywhere on the screen. This feature does not work on the keyboard or navigation bar.

Interaction Controls

• **Timing controls:**

- » Touch & hold delay: Set the desired touch and hold delay to Short, Medium, or Long to customize the length of touch time that is considered one touch.
- » Time to take action (Accessibility timeout): Select how long a message that asks you to take an action stays visible on the screen so that you have time to read it. This may not be supported by all apps.
- » Autoclick (dwell timing): Automatically clicks where the pointer stops after a set amount of time.

• **System Controls:**

- » System navigation: Navigate through screens using gestures or buttons.
- » Power button ends call: Press the power button to end a call instead of having to touch the screen.
- » Auto-rotate screen: Automatically change the screen orientation according to the physical position of the device. Default mode is ON.

• **Vibration & haptic strength:** Turn ON/OFF the ring vibration, notification vibration and touch feedback options that alert you to incoming calls, messages, and other notifications.

Captions

- **Caption preferences:** Show closed captions and subtitles for videos for the hearing impaired. You can select language, text size and caption style.

Audio

- **Hearing aids:** Pair your hearing aid or cochlear implant to improve hearing and speech comprehension.
- **Audio adjustment:**
 - » Mono audio: Turn ON/OFF to select mono or stereo sound for your device.
 - » Audio balance: Adjust the audio output balance using the sound balance slide bar.

General

• **Accessibility shortcuts:**

- » Accessibility Button: Provides an accessibility icon at the bottom of the screen. Tap the icon to launch a large on-screen menu that gives you access to several features on your phone.
- » Shortcut from lock screen: When a shortcut is turned ON, press both volume keys for 3 seconds to start the accessibility feature you select.

- **Text-to-speech output:** Set the language, speech rate and pitch of the Screen Reader so you can best understand its voice.

APPS

► Home screen > Swipe up

The apps home screen displays all preloaded and downloaded apps. Some apps have a quick-access shortcut that can be easily accessed with a simple touch and hold of the app icon. Additionally, some apps provide usage information when you hold down the app icon.

You can uninstall, disable, or hide apps from view automatically. Preloaded apps cannot be uninstalled. Disabled apps will be turned OFF and hidden.

Use Folders

You can create and name folders to help you organize app shortcuts on the home screen. If you delete a folder, the app shortcuts will return to your apps list.

To create a folder:

1. From the Home screen touch/hold an app shortcut and drag it on top of another app shortcut until a highlighted circle is displayed.
2. Release the app shortcut to create a folder.

Play Store

Play Store is the app store for Android devices and, also serves as a digital media store offering games, books, movies, television programs and more. Applications are available through the Play Store either free of charge or at a cost. You can organize app widgets and folders for applications you download on the Home screen as necessary and based on your preferences.

Google Apps

Google Apps are a suite of web-based messaging, collaboration and productivity applications that are provided by Google as a service, rather than as software that you need to download and install. These apps can be used for personal, and business needs to create documents, store images, set calendars and more. Your files are securely stored on Google servers protected by your account password and can be accessed from any device.

Several Google apps are pre-installed on your device and can be found in the Google folder on your Home screen.

- Google search engine
- Gmail
- YouTube
- YT Music
- Meet
- Wallet
- Assistant
- Chrome
- Maps
- Drive
- Google TV
- Photos
- Play Store
- Home

Android Auto

- ▶ Settings > Connected devices > Connection preferences > Android Auto

Android Auto integrates your phone into your car's entertainment system. If your car is compatible, and has a display or a touchscreen, Android Auto can mirror the phone's screen on the car's display screen, and you will be able to access your phone using voice commands or the car's touchscreen or buttons, and thereby minimize the need to reach for your phone while you drive.

CALENDAR

- ▶ Home Screen > Swipe up > Calendar

This is where you can create and schedule a goal, a reminder, or an event and set them for today, tomorrow, or for a specific date. You can view the calendar as a 1-day, 3-day, week, or one-month grid. You can add notes, comments and edit any entry as needed.

Events from your Gmail account such as reservations for flights, restaurants, or other similar events, are automatically added to your calendar. For additional convenience, maps can be added directly on your calendar also, so you can access them easily. You can change these preferences in Settings.

You can share your calendar with family, friends, and co-workers, so you can be sure not to miss or overlap any appointments or events. When your schedule is saved from the device to your Google account, it is automatically synced with your Google calendar. Once you sync your other devices with your Google calendar, all events that have been saved will also appear on those devices.

CAMERA

➤ Home Screen > Camera

Rear camera: 13MP

Front camera: 5MP

Video recording resolution: 1080p @30fps

The pictures and high-quality videos you take with the phone's camera are, by default, saved to your phone's Photos. If you have an optional memory card (not included) installed, you can select to save pictures and videos to the memory card. You can also back them up to the Cloud for future access and to help keep memory space on your device available.

This device can support up to a **512GB** microSD card. Some memory cards may not be fully compatible.

Take a picture

You can take a picture using any of the ways listed below.

- Tap the capture icon.
- Press the Volume up or down key: Great option when you're taking selfies.
- Tap anywhere on the screen to capture. This will need to be configured in the camera settings first.

Options

➤ Camera > Top of screen

- **Flash:** Set to ON, OFF or AUTO to produce the lighting effect you want.
- **Aspect ratio:** Choose image size between full, 16:9, 4:3, or 1:1.
- **Filter:** Select from a series of pre-installed filters that apply a mood/effect to the image.
- **Torch:** In video mode, you can turn ON a flashlight to illuminate your subject while you are recording.

Settings

▶ Camera > Settings icon

Now, with interactive settings you'll be able to preview the available options before making your final selection.

- **Touch shot:** Tap anywhere on the screen to capture. Default setting is OFF.
- **Self timer:** Take 3-second, 5-second or 10-second time-delayed pictures.
- **Shutter sound:** Enable or disable the sound the shutter makes when you take a picture. Default setting is ON.
- **Framing lines:** Displays horizontal and vertical grid lines as references to help you align different elements in the picture.
- **Geo tagging:** Attach a GPS location tag to the picture. Default setting is ON.
- **Picture size:** Choose image size between 4:3, 16:9, 1:1, or 20:9.
- **Reset settings:** Reset all camera settings to their default modes.

Modes

▶ Camera > Bottom of screen

You can select a camera mode that suits your imaging needs. Once you select the mode, you can allow the camera to determine the ideal settings or you can manually adjust the settings so that you get specific results.

- **Professional:** Manually adjust the ISO sensitivity, white balance, and color tone for the picture.
- **Video:** You can pause/re-start a recording, zoom in/out, or take a photo while you are recording video.
- **Photo:** Select a subject and tap on the screen where you want the main-focus area to be. The camera will automatically adjust the lighting or, you can adjust the lighting on the slide bar that appears.
- **Time-lapse:** Create a time-lapse video by recording at various frame rates.
- **Motion photo:** Allows you to record a short video of before and after you took a photo.
- **Selfie:** You can switch to the front camera to view your face on the screen and take selfies. You will be able to select the image quality, set a timer and adjust the flash settings.

Photos

- ▶ Home screen > Swipe up > Photos

Launching the Photos folder displays all the available visual images stored on your device. Images that are backed-up to Google Photos can be separated into different albums to help you find them easily. Additionally, you will be able to add an image to a contact, select it as your wallpaper, or create a slideshow from images in the Photos folder.

Edit pictures and videos

- ▶ Photos > Tap picture or video >
Tap edit icon at bottom of image

You can view and manage photos and videos saved on your device. Tap on the image or video and select from various editing options shown in the edit menu bar. Some image or video formats may not be supported.

Editing options include:

- Share photos and videos
- Crop and/or rotate image
- Adjust brightness
- Select filter
- Write or draw on the photo

Google Lens

Google Lens is a tool that allows your camera to use image recognition to identify and explore many things you interact with. You will be able to get information about landmarks, plants, animals, products, QR codes, labels, business cards and other objects.

To use Google Lens, just select a picture from your Photos and select the Google Lens icon. Google Assistant identifies the image and gives you information that you can use to learn specifics about the image, to take an action from suggestions presented, or to find similar products.

Google Lens can also be used to scan and auto-translate text, and to get definitions in most languages. To use it for smart text selection, just point your camera at the text you need, and copy/paste it into a new screen.

CONTACTS

► Swipe up > Contacts

You can create, edit, import, manage contacts in your device and sync them with your other devices. Contacts can be backed-up to Google Drive if you have a Google (Gmail) account, or you can back them up manually to a memory card (not included) if you have one installed.

You can designate a contact as a favorite for easy access and you can also create a widget for those you use most frequently.

Make a Contact widget

To create a widget for a contact previously stored in your device, press and hold an empty spot on the home screen, tap Widgets, select Contacts, then press and hold the Contacts widget. Drag it to your home screen, then select the contact you want to assign to that widget.

DATA USAGE

► Settings > Network & internet > Mobile network

Your smartphone Service Plan includes data. There are several options to monitor how your data is being used, and to set limits and restrictions to conserve it. If you choose to log in to Wi-Fi networks, it is important that you connect to known, secure networks and set up passwords as necessary.

The Mobile network menu will allow you to:

- Turn Mobile Data On or Off
- Turn Data Saver On or Off
- Set or remove limits to mobile data usage and warning
- Monitor mobile data usage for your apps

DIGITAL WELLBEING & PARENTAL CONTROLS

➤ Settings > Digital Wellbeing & parental controls

You can monitor and manage your digital habits by getting a daily view of your digital usage on the Dashboard. You can also set your device to supervise your children's digital life.

Your Digital Wellbeing tools

Screen time

- **Screen time:** Tap the time value in the daily chart to see how long each app has been opened and used that day.
- **Unlocks:** Tap to see how many times each app has been opened that day.
- **Notifications:** Tap to see how many notifications have been received from each app that day.

Ways to disconnect

- **Dashboard:** Set a daily limit for how long each app can be used on your device that day.
- **Bedtime mode:** Once enabled, the screen converts to greyscale and all notification sounds will be muted. This feature helps you disconnect from your device and avoid interruptions during the set schedule.
- **Focus mode:** Configure a schedule to avoid receiving notifications and other distractions from your phone during that time. You can select apps that you want to exclude from the schedule.

Reduce interruptions

- **Manage notifications:** Turn notifications ON/OFF or set the visual/sound alerts you receive for each app.
- **Do not disturb:** Set a schedule to silence the sounds and vibration of your device for all contacts and notifications. You can create a priority list of the ones you want to still receive.
- **Heads up:** Get a reminder to focus on your surroundings if you are walking and using your device at the same time.
- **Show icon in the app list:** Add the Digital Wellbeing & Parental Controls icon to the apps home screen.

Parental controls: Supervise your children's digital life with Google's Family Link app available in the Play Store. You can choose apps, set content filters, keep an eye on screen time, and set screen time limits for each user.

GESTURES

- ▶ Settings > System > Gestures

The Gestures features make your phone easier to use and let you customize notifications, actions, and the way you interact with your device.

Gesture customization options include:

- **Quickly open camera:** Press the power button twice to open the camera.
- **System navigation:** Navigate through screens using gestures or buttons.
- **Press and hold power button:** Easily launch Google Assistant by pressing and holding the power button.
- **Prevent ringing:** Press the Power and volume UP button at the same time to set the phone to either vibrate or mute.

MULTIPLE USERS

- ▶ Settings > System > Multiple users

You can share this device with other people by adding users. Each user has their own profile, and they can customize the phone with apps, wallpaper, accessibility features and other settings to fit their needs while they are logged in to their profile.

Any user will be able to update apps and adjust settings like Wi-Fi that are used by everyone. Updates and settings for shared functions will be applied to all user profiles.

NEARBY SHARE

- ▶ Settings > Connected devices >
Connection preferences > Nearby Share

This platform enables reliable and easy sharing of your pictures, files, links, and other content across compatible devices even if they are from different manufacturers. Content will be shared via the method that the two devices recognize as fastest: Bluetooth, Bluetooth Low Energy, WebRTC or peer-to-peer Wi-Fi which will allow Nearby Share to work even if you are offline.

For added protection, you can set your preferred visibility to be seen by All Contacts, Some Contacts, or Hidden so that you never receive files that you didn't ask for.

OFFICE FEATURES

Printing

- ▶ Settings > Connected devices > Connection preferences > Printing

Connect to compatible Bluetooth printers (not included) to print images and documents. To install a print driver, simply tap Add service and install the print driver that you may need from the Play Store.

Split screen multi-tasking

- ▶ Recent apps > Tap app icon > Split screen > Tap second app

The Split screen function is a convenient way to multi-task by using two apps at the same time. You will be able to adjust the size of each window as necessary. In addition, you will be able to make a call, browse the web or send a text message with the split screen feature enabled. This feature may not work with all apps.

VPN

- ▶ Settings > Network & internet > VPN

A virtual private network (VPN) is a network that is constructed using public wires, usually the Internet, to connect remote users or regional offices to a company's private, internal network.

Set Up and Manage a VPN

To connect to a VPN, you will need the connection information from your VPN administrator, and you must set a secured screen lock. Use the VPN settings menu to add, edit, or delete a VPN connection to your device.

SCREENSHOTS

When you capture a screenshot, a Screenshots album will automatically be created in Photos where all screenshots will be saved. You can capture an image of your screen several ways:

- Press the Power button and the volume DOWN key quickly at the same time.
- Tap the recently-used applications icon and tap Screenshot.

SECURITY

Google Play Protect

➤ Settings > Security > Google Play Protect

Google Play Protect runs a safety check on apps from the Play Store before you download them. You can configure Google Play Protect to regularly check installed apps and your device for security risks and threats. App updates are checked automatically, and you will receive a notification if any security threats are detected. Default setting is ON.

Find My Device

▶ Settings > Security > Find My Device

Find My Device will help you locate your device and protect your data. You must have a Google (Gmail) account and turn Google location service ON in order to use this feature. If your phone is lost, you will be able to log in to your Gmail account and remotely perform various functions to help you keep your information secure and locate your phone. Default mode is ON.

Use the Find My Device feature to:

- Make your phone ring
- Send you the device's last location
- Lock/Unlock your phone
- Erase data
- Set a screen message
- Set guardians

Screen Lock

▶ Settings > Security > Screen lock

It is recommended that you secure your device using a Screen lock. This added level of security helps prevent someone from accessing your device including your personal data, apps, and email accounts. There are a variety of screen lock types with different levels of security for your selection including swipe, pattern, numeric PIN, password, or face recognition.

In addition, you can set a Smart Lock to unlock your device automatically and keep it unlocked when you are in a trusted location or when trusted devices are detected.

Face Unlock

► Settings > Security > Face unlock

Face Unlock is a security option that will let you unlock the screen by simply raising your phone and looking at the screen. You will need to set a secure screen lock type first, and allow Face Unlock to take pictures and record video in order to create your face scan and complete the set-up process. Once you have completed the set-up, your phone will also show notifications on your lock screen when you are looking at it. Face scans can be deleted or updated as necessary.

Facial recognition data will be saved only to your phone and will not be backed-up.

SIM Card Lock

► Settings > Security > SIM Unlock

Your SIM card includes information like your phone number and voice/data plans, which can be compromised if the SIM card is placed into another device. To help protect it, you can create a SIM card PIN that will lock access to the SIM.

App Pinning

► Settings > Security > App pinning

App pinning allows you to pin an app to the screen and block usage of all other functions of the phone including calling, texting and other frequently used apps. This feature is very helpful if you want to lend your phone to another user, such as a child, so that they can only use the pinned app. For example, if you pin YouTube, it is the only function they will be able to use, and all other functions of your phone are locked.

When you want to return to regular usage mode, hold the Back and Recent Apps buttons at the same time for a few seconds. To unpin an app, you may need the authorized user's security PIN, pattern or password.

Permission manager

► Settings > Privacy > Permission manager

Some apps, like the camera, microphone, or location services, access features of your device when they are running in the background and not just when you are using the app. You can give or deny such access to each app and set your device to notify you when access is requested for each category you select.

Wi-Fi

► Settings > Network & internet > Wi-Fi ON/OFF

Wi-Fi is a term used for a wireless network technology that provides wireless high-speed internet and network connections without using the data allocated to your service plan. When Wi-Fi is turned ON, your device automatically scans for available networks and displays them. You may be required to enter a password to connect.

When you select a public/unprotected network, you are automatically connected to that network. Connecting to a public Wi-Fi network can leave your personal data vulnerable, so it is important that you connect to known, secure networks and set up passwords as necessary.

Wi-Fi Direct

- ▶ Settings > Network & internet > Wi-Fi > Wi-Fi preferences > Wi-Fi direct

This feature uses Wi-Fi capability to share data between two or more Android devices even if they are from different manufacturers. You will not need to be connected to a Wi-Fi network.

Share

- ▶ Settings > Network & internet > Wi-Fi > Select connected Wi-Fi > SHARE icon

You can generate a QR code that contains the credentials of your Wi-Fi network so that guests, or those who might need only temporary access to your Wi-Fi, can safely connect by scanning the QR code with their phone's camera.

Devices must be running on Android 10 or newer and must support the Easy Connect Wi-Fi standard for this feature to work. Not all devices will be compatible.

Before You Start
WARNING! Cancer and Reproductive Harm
www.P65Warnings.ca.gov

Safety Information

Please carefully read the terms below:

Use Safely

Do not use the phone in situations where it might cause danger.

Transportation Safety

Please observe all transportation laws and regulations.

Please drive with both hands on the wheel.

PLEASE DRIVE RESPONSIBLY - DO NOT TEXT AND DRIVE

Hospital Safety

Please follow hospital rules and limitations.

Please turn off your mobile phone when near medical instruments.

Airport Safety

Remember to follow all airport and flight safety regulations.

Chemical Warning

Do not use your mobile phone around fuels or chemicals.

Temperature Warning

Do not subject your phone to extreme temperature conditions.

Water Hazard

Your phone is not waterproof. Keep your phone away from water or liquid to avoid damage.

Emergency Calls

Make sure your mobile phone is switched on and in a service area. In home screen, tap the phone key and dial the emergency number.

Accessories and Batteries

Use only BLU authorized batteries and accessories.

Information Backup

Remember to keep a written record of important information.

Battery Safety and Precautions

- For better performance and longer battery life, it is recommended that you charge the battery fully before using the mobile phone for the first time.
- The optimum performance of a new battery is typically achieved after two or three complete charge cycles.
Note: Keep in mind that continuous overcharging will affect long-term battery life.
- While charging, keep the mobile phone out of the reach of children.
- Store the battery in a cool and dry place away from direct sunlight and water.
- Do not expose batteries to extreme temperatures (below -8°C (18°F) or above 43°C (110°F)).
- Immediately stop using the battery if it produces an odor, cracks and leaks, overheats, distorts or has any other type of physical damage.
- Avoid using the charger near or around liquids. If the charger is exposed to water or any liquids, immediately unplug it from the outlet to reduce the risk of overheating, charger malfunction, electric shock or fire.

Hazardous Waste – Battery Disposal

Warning: Do not throw away batteries with uncontrolled daily waste.

The marking in this manual indicates that the batteries in this product should not be disposed with household trash at the end of its working life. If the batteries are not disposed of properly, the substances included can cause harm to human health and the environment. Please follow environmental laws and guidelines for proper waste disposal.

Cleaning and Maintenance

- Avoid using the handset and accessories in excessively moist areas to avoid malfunction.
- Use a soft, dry cloth to clean the handset, battery and charger.
- Do not use alcohol, thinner, benzene or any other solvent to clean the handset.

Safety precautions for power supply unit

Use the correct external power source

A product should be operated only on the type of power source indicated on the electrical ratings label. If you are not sure of the type of power source required, consult your authorized service provider or local power company. For a product that operates from battery power or other sources, refer to the operating instructions that are included with the product.

This product should be operated only with the following designated power supply unit(s)

Handle battery packs carefully

This product contains a Lithium-ion battery. There is a risk of fire and burns if the battery pack is handled improperly. Do not attempt to open or service the battery pack. Do not disassemble, crush, puncture, short circuit the external contacts or circuits, dispose of in fire or water, or expose a battery pack to temperatures higher than 104°F (40°C). The operating temperature for the phone is -14°F (-10°C) to 104°F (40°C). **Warning: Danger of explosion if battery is incorrectly replaced.**

To reduce risk of fire or burns, do not disassemble, crush, puncture, short circuit the external contacts, expose to temperature above 104°F (40°C), or dispose of in fire or water. Replace only with specified batteries. Recycle or dispose of used batteries according to the local regulations or reference guide supplied with your product.

Take extra precautions

- Do not disassemble or open crush, bend or deform, puncture or shred.
- Do not short circuit a battery or allow metallic conductive objects to contact battery terminals.
- The phone should only be connected to products that bear the USB-IF logo or have completed the USB-IF compliance program.
- Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, expose to fire, explosion, or other hazards.
- Battery usage by children should be supervised.
- Only use the battery for the system for which it is specified.
- Only use the battery with a charging system that has been qualified with the system per CTIA Certification Requirement for Battery System Compliance to IEEE1725. Use of an unqualified battery or charger may present a risk of fire, explosion, leakage, or other hazards.
- Replace the battery only with another battery that has been qualified with the system per this standard, IEEE-Std-1725. Use of an unqualified battery may present a risk of fire, explosion, leakage, or other hazards.
- Promptly dispose of used batteries in accordance with local regulations.
- Avoid dropping the phone or battery. If the phone or battery is dropped, especially on a hard surface, and the user suspects damage, take it to a service center for inspection.
- Improper battery use may result in a fire, explosion, or other hazard.

If the battery leaks:

- Do not allow the leaking fluid to come in contact with skin or clothing. If already in contact, flush the affected area immediately with clean water and seek medical advice.
- Do not allow the leaking fluid to come in contact with eyes. If already in contact, DO NOT rub; rinse with clean water immediately and seek medical advice.
- Take extra precautions to keep a leaking battery away from fire as there is a danger of ignition or explosion.

Hearing Aid Compatibility (HAC) for Wireless Telecommunication Devices

This phone has a HAC rating of M4/T4

What is hearing aid compatibility?

The Federal Communications Commission has implemented rules and a rating system designed to enable people who wear hearing aids to use these wireless telecommunications devices more effectively. The standard for compatibility of digital wireless phones with hearing aids is set forth in American National Standard Institute (ANSI) standard C63.19. There are two sets of ANSI standards with ratings from one to four (four being the best rating): an "M" rating for reduced interference making it easier to hear conversations on the phone when using the hearing aid microphone, and a "T" rating that enables the phone to be used with hearing aids operating in the tele-coil mode thus reducing unwanted background noise.

How will I know which wireless phones are hearing aid compatible?

The Hearing Aid Compatibility rating is displayed on the wireless phone box. A phone is considered Hearing Aid Compatible for acoustic coupling (microphone mode) if it has an "M3" or "M4" rating. A digital wireless phone is considered Hearing Aid Compatible for inductive coupling (tele-coil mode) if it has a "T3" or "T4" rating.

FCC Regulations**Federal Communication Commission Interference Statement**

FCC ID: YHLBLUB1550VL

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Radiation Exposure Statement:

This device meets the government's requirements for exposure to radio waves. This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard for wireless device employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. Tests for SAR are conducted using standard operating positions (10mm) accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands.
